Aloha Maria:

Would you be willing to conduct a peer review for the attached article: "Service relationships from the experiences and perspectives of people with physical disabilities in Taiwan"?

The purpose of this review is to establish whether or not we should:

- (a) publish this article without revisions,
- (b) publish this article with revisions,
- (c) deny publication but encourage re-submission with major revisions, or
- (d) deny publication.

Note that this article is for anonymous peer review. An anonymous peer review form is attached. Additional criteria for anonymous review include: (a) contribution to existing knowledge, (b) organization and readability, (c) soundness of methodology, (d) evidence supports conclusion, and (e) adequacy of literature review.

You are encouraged to provide the editors and authors with feedback through a summary of your opinion on the attached review form and/or by using the "insert comments" feature of your word processing program. Feedback is especially important if you are recommending acceptance with revisions or denial of publication.

The article with comments and the anonymous peer review form are due by May 8, 2014, one month from now.
