

# An Introduction to Team-Based Learning

Team-based learning is a pedagogy that is more than just teaching with teams. TBL provides a strong mechanism that encourages your students to come to class prepared and be ready for your hands-on exercises. TBL uses an inquiry-based approach but also adds organizational elements that can help teachers structure their class.

**Friday April 21, 2017**

**2:00 - 5:00 PM**

**1103 Education Building**

This workshop and collegial discussion is for you if:

- You are interested in having your students work together more effectively,
- You are doing Project-Based or Problem-Based Learning (PBL),
- You part of the Common Problem Pedagogy (CP2) initiative.

Why spend a Friday afternoon on Team-based Learning?

- Take part in a 1.5 hour workshop via videoconference with an expert in team-based learning from the University of Delaware.
- Actively participate in discussions with your colleagues on team-based learning.
- Snack on cheese, veggies, and chocolate while you learn about this pedagogical tool.
- Learn about upcoming workshops and professional learning communities on campus that utilize team-based and other active learning strategies.

**Please RSVP:**
